SUMMARY

Botpress Certified Partner specializing in **Arabic-first conversational AI** and end-to-end automation for the MENA market. 2+ years shipping production AI systems across healthcare, e-commerce, education, and tourism — including a 40-node call quality auditing pipeline (Whisper + GPT-4o + Pinecone RAG), large-scale data migrations (40K+ contacts with fault tolerance), and bilingual multi-agent platforms on Botpress ADK. Stack: Botpress, n8n, Odoo 17/18, Chatwoot, Node.js, Python. Measurable impact: **60% response-time reduction**, **80% manual-entry reduction**.

EXPERIENCE

AI Product & Technology Specialist — Engosoft Training & Consulting

10/2025 – Present · Remote

- Engineered a **40-node end-to-end call quality auditing pipeline** integrating Yeastar PBX with OpenAI Whisper (Arabic STT), GPT-4o scoring against 50+ behavioral criteria, and Pinecone-powered RAG; resolved 8kHz→16kHz upsampling in pure JS and Whisper truncation; outputs weekly reports + SLA auto-transfers.
- Built and maintained **“Fahad” (فهد)** — production Arabic customer service agent on Botpress with Chatwoot HITL bridge and **full Odoo integration (Helpdesk, Sales CRM, Contacts, Inventory — bidirectional read/write)**; serves 50,000+ trainees across WhatsApp, Messenger, and webchat.
- Designed **“Majed” (ماجد)** — educational AI assistant (v13 prompt) on Gemini 2.5 Flash + n8n + Odoo + Google Calendar + Zoho Mail for course registration, scheduling, and quiz workflows.
- Led an **Odoo 17 → 18 migration** covering data, custom modules, and workflow re-engineering with continuity guarantees.
- Built **bidirectional product database sync** between Shopify/external sources and Odoo with real-time SKU, price, and stock mapping plus conflict resolution.
- Engineered **Bosta shipping carrier integration with Odoo** — automated waybill generation, real-time tracking, and end-to-end fulfillment workflows.
- Developed a custom **Odoo 17 module (engosoft_call_quality)** with role-based ACLs, JSON-to-report automation, analytics dashboards, and CRM integration.
- Designed real-time **Shopify ↔ Odoo 18 order synchronization** via n8n webhooks (customers, products, shipping, payment, discounts).
- Developed a **Node.js Bridge Server** syncing Botpress ↔ Chatwoot for seamless bot-to-human handoff, deployed on self-hosted Coolify infrastructure.
- Executed a **large-scale UChat-to-Chatwoot migration of 40,000+ contacts** with a fault-tolerant GitHub Actions pipeline (resume capability + exponential backoff); fixed WhatsApp source_id numeric formatting.
- Shipped the **Engosoft marketing website** (React + Vite + Framer Motion, Coolify-deployed) and a 24-node n8n SEO content pipeline (Gemini 2.5 Flash + Serper + Google Autocomplete).

AI Solutions Engineer — XQ Pharma

03/2024 – 10/2025 · Cairo, Egypt

- Built a **multi-channel AI agent** for WhatsApp, Messenger, and web — reducing average response time by **60%**.
- Shipped **“Dr. Sophia”** — Botpress chatbot with Shopify CDN-backed product catalog for skincare/haircare recommendations.
- Developed **“Doctor AI”** to assist pharmacy staff with drug interactions, dosage, and product info via NLP-driven KB retrieval.
- Designed and deployed a **Shopify Loyalty & Points app** (Node.js/Express + Prisma/PostgreSQL + Shopify Polaris) on GCP with SSL at loyalty.xqpharma.net.

- Automated web order processing with Google Sheets integration and print-ready output, reducing manual entry by **80%**.
